Testimonials

“The person you didn't know was there, actually comes out. We learned that art is pathways and memories, a playground of feelings.”

Teacher

“We learnt that in art you do more thinking than doing, because you think a lot do a little and think again. Not every book has to have words in, I felt that I actually had to think more than I normally do with school work.”

Child

“My sketchbook is a vital tool for my A Level course. It enables me to develop and document my ideas from a set title. The sketchbook is my cement towards building my final piece; it is both fluid and concrete, set ideas that are ever changing and morphing into new ones.”
